

KARAMJIT SINGH

PROFESSIONAL SUMMARY

To obtain a Software Engineer Co-Op position as a Software Developer, I've a remarkable background of 2+ years in Java Development with designing, developing, and delivering user-centric web applications using Java/J2EE technologies. Solutions-oriented proficiency from extensive analysis through execution and maintenance in the Java Development Life Cycle.

WORK EXPERIENCE

Jr. Java Developer

Real IT Solutions Pvt. Ltd., Pune, June/2019 – April/2022

- Worked with Java frameworks like Spring MVC, and Spring Boot to develop fully automated client management systems.
- Assisted Junior & Senior employees in the development and testing of J2EE programming code and applications.
- Perform code reviews based on defined structures and manage technical tasks within a standard workflow.

PERSONAL PROJECTS

GYW (Get Your Website)

Jun/2022 – Oct/2022

- Basically, this app is an online platform where customers can get their websites according to their business requirements.
- This project is developed in Spring Boot Thyme leaf template with MySQL database. This website is running live on the Heroku platform for testing and further development.

Project URL- <http://gyw.herokuapp.com>

My Angular App

Nov/2022 – March/2023

- In this app, I've used Java Rest API with the Angular framework.
- MySQL Database to explore the features of the Angular Material UI component library.
